

Vented, Indirect Solar Water Heating Schematic.

Key:

-  Stop tap / service valve / isolating point
- 1. Solar Panel plus optional auto air vent
- 2. Hot water cylinder with Solar Coil
- 3. Differential Temperature Controller with pump control, cylinder and panel temperature probes
- 4. Pump
- 5. Single Check Valve and Pressure Gauge
- 6. Expansion Vessel
- 7. Pressure Relief Valve and Tundish
- 8. Optional Filling Loop with detachable link pipe and double check valve.
- 9. Solar Drain Point
- 10. Cold Water supply and Mains Electricity feed
